

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

WS Keyridge UK Equity and Bond Income Fund (the "Fund"),

a fund within WS Keyridge Asset Management (UCITS) Fund (the "Company")
Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund.

Class A Accumulation (ISIN: GB00B739W739)

Objective and Investment Policy

Objective

To provide income (money available to be paid out by the Fund) and the potential for capital growth (an increase in the value of the Fund), after all costs and charges have been taken, over any five year period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 80% of the Fund in the shares of UK companies and bonds (loans that usually pay interest) issued by UK companies and/or the UK government and public bodies (such as a local authority). As part of this the Fund may also invest in REITs (Real Estate Investment Trusts are companies that aim to generate an income and/or profit from investing in property).

The Fund's exposure to company shares will be in the range of 60% - 80% and the exposure to bonds will be in the range of 20% - 40%. Investment outside of these ranges may be made when, in the opinion of the Investment Manager, the market conditions or market outlook are such that this would be to the advantage of the Fund. During such periods, the Fund may invest between 40% and 80% in company shares and 20% and 60% in bonds.

The Fund may also invest up to 20% in money market instruments (which are short term loans that pay interest) and cash.

The Investment Manager undertakes a review of asset allocation focusing

on a quarterly basis, which determines how much the Fund will invest in each asset class and at a more granular level within each asset class to determine, for example, for bonds, whether government or corporate bonds are preferred. The Investment Manager then uses a bottom up approach (an investment approach that focuses on analysing individual investments rather than the asset class). The Investment Manager will buy shares and/or bonds which, in their opinion, have a robust business model, strong financial position and are able to provide a stable/growing level of income.

Other features of the Fund:

The Fund is actively managed. The Investment Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

The Fund can invest in other funds (including those managed by the Manager, the Investment Manager and its associates).

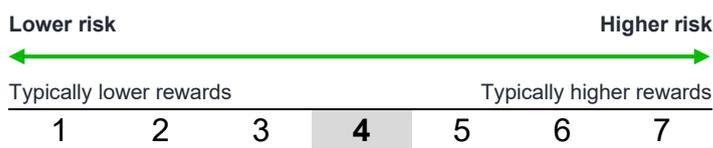

You can buy and sell shares in the Fund on each business day.

Any income generated from the Fund is reinvested and reflected in the value of your investment.

Derivatives (whose value is linked to that of another investment, e.g. company shares, currencies) may be used to manage the risk profile of the Fund.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio can be found at www.waystone.com.

Risk and Reward Profile

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns have varied. It is a measure of the Fund's volatility.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free.

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise.

- Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.
- Property Fund Investment Risk: Property Funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.
- Change in Interest Rate Risk: A rise in interest rates generally causes

bond prices to fall. The value of fixed interest securities may also be affected by trends in interest rates, inflation and credit ratings.

- Credit Risk: The value of a bond or other fixed interest security may be affected by its credit rating. A lower credit rating increases the risk that the issuer may not pay interest or repaying the loan. Fixed interest securities are also influenced by trends in interest rates and inflation, which can cause their value to fluctuate.
- Liquidity Risk: The Fund may invest in assets such as corporate bonds or shares in smaller companies, that could become difficult to buy or sell in adverse market conditions. This may delay or restrict the Fund's ability to meet redemption requests and could negatively affect the Fund's value.
- Concentration Risk: The Fund intentionally holds a relatively small number of investments and may also invest in securities within a particular industry, sector or geographical focus. This means that the performance of a single investment, industry, sector or region may have a greater impact on the Fund's value. The value of the Fund may therefore be subject to large swings (both up and down) compared to a more diversified portfolio.
- Company Bond Risk: In unfavourable market conditions, bonds issued by companies may be harder to sell in a timely manner and at reasonable prices, than in normal market conditions. This could have a negative impact on the value of the Fund. In extreme market conditions this could affect the Fund's ability to meet investors' redemptions.
- Securities Lending Risk: The Fund may receive additional income for lending the investments it holds (e.g. company shares) to other parties. If the borrower fails to meet their obligations, then the Fund may incur a financial loss.

For more information about the Fund's risks, please see the Risk Factors section of the prospectus which is available at www.waystone.com.

Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge	None
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out. In some cases, you may pay less. Please check with your financial adviser or distributor for the actual charges.

Charges taken from the Fund over the year

Ongoing Charges	1.72%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	None
-----------------	------

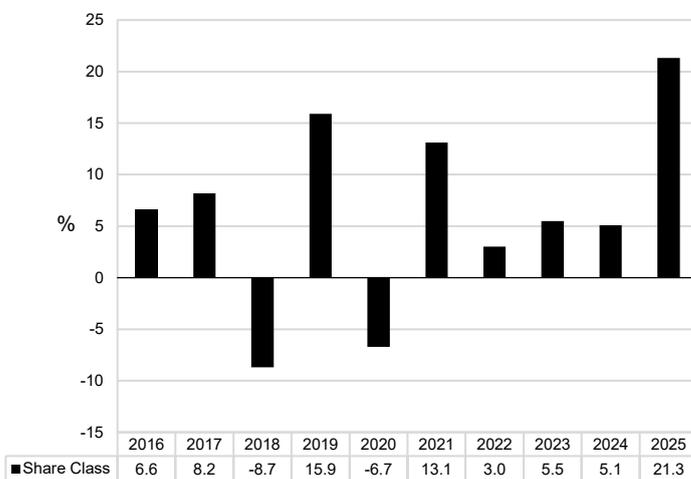

The ongoing charges figure is based on expenses as at 15 August 2025. This figure may vary from year to year.

The ongoing charges are taken from the capital of the Fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

A dilution levy (an amount to cover dealing costs incurred by the Fund) may be charged when you buy or sell shares. This separate charge is normally only applied when dealing costs are significant.

For more information about charges (including any charges applied to the offset dealing costs), please refer to the Company's Prospectus, available at www.waystone.com.

Past Performance

Past performance is not a guide to future performance.

The past performance in the chart is net of tax and charges but excludes any entry or exit charges that may apply.

The Fund was launched on 25 May 2012. This share class was launched on 28 May 2012.

Past performance is calculated in GBP.

The Fund changed its name from WS Canlife UK Equity and Bond Income Fund to WS Keyridge UK Equity and Bond Income Fund on 18 February 2026.
