

KEY INVESTOR INFORMATION

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

WS Guinness Global Energy Fund (the "Fund"), I Accumulation, a fund within WS Guinness Global Energy Fund (the "Company") (ISIN: GB00B56FW078)

Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund

Objective and investment policy

Objective

The Fund aims to provide investors with capital growth over the long term (7 years or more).

Investment Policy

Under normal market conditions, at least 80% of the Fund will invest directly or indirectly in listed equity securities of companies with a wide range of market capitalisation anywhere in the world (including emerging markets) engaged in the oil and gas sector, energy generation and/or transmission. Accordingly, the Investment Adviser will seek investment in companies involved in any of the following: the production, exploration or discovery, or distribution of energy derived from fossil fuels and the research and development or

production of alternative energy sources, as well as those companies that provide services and products for all the foregoing. Alternative energy includes, but is not limited to, energy derived from such sources as solar or wind power, hydroelectricity, tidal flow, wave movements, geothermal heat, biomass or biofuels. Additionally, the Fund may invest in companies seeking to develop and exploit new energy technologies (including technologies that enable these sources to be trapped, stored and transported as well as those that conserve or enable more efficient use of energy).

Direct or indirect investment in equity securities shall include investment in any proportion in: shares (including those issued by investment trust companies and REITs), securities convertible into

shares, depository receipts, collective investment schemes investing in equities (up to 10%) and (up to 5%) warrants. To the extent not fully invested in such companies, the Fund may invest in other transferable securities. For temporary defensive management, the Fund may also hold cash,

near cash, money market instruments, units in money market funds or short-dated government bonds to protect the Fund from adverse

market conditions and/or to manage large cash flows; accordingly at these times the Investment Adviser may hold a larger proportion of the Fund in these asset classes and in such circumstances, less than 80% of the Fund may be invested directly or indirectly in listed equity securities.

The Fund is actively managed by the Investment Adviser. The Fund will normally hold around 30 positions of approximately equal weight, but the portfolio may vary over time, and under normal market conditions, the Fund may have as few as 25 holdings.

Where the Fund invests in collective investment schemes, this may include those managed by the ACD and its associates.

Essential features of the Fund:

- Transactions are processed at 12 noon UK time and we will include your instruction to buy or sell on the same day if it is received before that point.
- Distribution policy: This is an accumulation class. Any income this Fund receives is reinvested into the Fund and automatically reflected in the value of your investment.
- The Fund may also use derivatives to reduce risk or cost or to generate additional capital or income at proportionate risk (known as "Efficient

Portfolio Management"). It is intended that the use of derivatives will be limited.

- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money in the short-term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

Risk and reward profile

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund has been classed as 7 because its volatility has been measured as high.
- The Fund is in the above risk category as the Fund's price has shown high fluctuations historically. The lowest category does not mean a Fund is a risk free investment.
- The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.

- The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- There is no guarantee that the Fund will meet its stated objectives.
- A limited number of investments may be held, which has the potential to increase the volatility of performance.
- Investment in emerging markets can involve greater risk than established markets which may lead to increased volatility of returns.
- The Fund is subject to risks associated to global energy markets including the supply and demand of energy commodities and political, economic and financial events. The Fund may also have a bias towards companies engaged in energy exploration and production, a part of the sector that is particularly speculative meaning risks are greater. The share prices of these companies are also sensitive to rises and falls in the oil price, which may lead to increased volatility of returns.
- The Fund may invest in smaller companies. These securities are often traded less frequently than those of larger companies, this means they may be more difficult to buy and sell. Their prices may also be subject to short term swings.
- There is a risk that any company providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.	
Exit Charge	None
Charges taken from the Fund over the year	
Ongoing Charges	0.95%
Charges taken from the Fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on the expenses incurred by the Fund as at 31 December 2024

The figure may vary from year to year. It excludes payments related to interest on borrowing and portfolio transaction costs, except in the case of transaction fees payable to the custodian.

The annual management charge is taken from income.

For details of the actual charges, please contact your financial adviser/distributor.

Past performance

- You should be aware that past performance is not a guide to future performance.
- Prior to 31 July 2019, the Fund was called the Artemis Global Energy Fund and was managed by Artemis Fund Managers Limited. From 31 July 2019 the Fund is managed by Guinness Asset Management Limited.
- Fund launch date: 21/04/2011.
- Share/unit class launch date: 21/04/2011.
- Performance is calculated in GBP.
- Performance is shown inclusive of all charges, except entry charges.
- Performance is shown on a total return basis (on the basis that distributable income has been reinvested).
