

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

WS Keyridge Short Duration Corporate Bond Fund (the "Fund"),

a fund within WS Keyridge Asset Management (UCITS) Fund (the "Company")
Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund.

Class I Income (ISIN: GB00BD0CNQ36)

Objective and Investment Policy

Objective

To achieve income (money available to be paid out by the Fund) with the potential for capital growth (an increase in the value of the Fund), after all costs and charges have been taken, over any five year period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 80% of the Fund worldwide and in other geographical regions in bonds issued by companies (which are loans to a company that usually pay interest), that are rated investment grade and are priced in British pounds sterling (the UK currency) with a maturity date equivalent to or less than 5 years. The risk of default (that is whether the issuer will pay interest and repay the loan) is lower on bonds rated as investment grade, than it is on non-investment grade bonds.

The Fund may also invest up to 20% worldwide in other bonds (including those issued by governments and public bodies, non-investment grade company bonds and bonds priced in currencies other than British pounds sterling), money market instruments (which are short term loans that pay interest) and cash.

The Investment Manager considers macroeconomic factors (such as interest rates and inflation) and uses bottom-up analysis (analysing individual bonds rather than industry sectors) to determine which bonds to invest in. The Investment Manager selects bonds based on a number of

factors including the price of the investment relative to its peers, past performance and outlook.

Other features of the Fund:

The Fund is actively managed. The Investment Manager uses its expertise to select investments for the Fund and has the discretion to invest without the need to adhere to a particular benchmark.

The Fund can invest in other funds (including those managed by the Manager, the Investment Manager and its associates).

The Fund can invest across different geographic areas and industry sectors without limitation.

You can buy and sell shares in the Fund on each business day.

The Fund aims to distribute available income every six months. The level of income is not guaranteed and may fluctuate.

Derivatives (whose value is linked to that of another investment, e.g. company shares, currencies) may be used to manage the risk profile of the Fund.

The bonds are rated by the Investment Manager. They will generally be in line with the major external rating agencies and should not be higher than the highest external rating agency rating.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within 5 years. More information on the management of this portfolio can be found at www.waystone.com.

Risk and Reward Profile

This indicator shows how much the Fund has risen and fallen in the past, and therefore how much the Fund's returns have varied. It is a measure of the Fund's volatility.

The higher a Fund's past volatility, the higher its position on the scale and the greater the risk that investors may have experienced losses as well as gains.

The Fund has been classed as 3 because its volatility has been measured as medium to average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward profile shown is not guaranteed to remain the same and may change over time.

The lowest number on the scale does not mean that the Fund is risk-free.

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise.

- Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.
- Emerging Markets Risk: The Fund may invest in emerging markets, which are markets in developing countries. These markets may be more volatile than developed markets and may have less well-developed

regulatory systems and disclosure standards. Emerging markets may have more political and economic risks that may result in large and frequent price movements. There is also a higher risk of liquidity issues or counterparty defaults, which could cause a loss to the Fund.

- Change in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall. The value of fixed interest securities may also be affected by trends in interest rates, inflation and credit ratings.
- Credit Risk: The value of a bond or other fixed interest security may be affected by its credit rating. A lower credit rating increases the risk that the issuer may not pay interest or repaying the loan. Fixed interest securities are also influenced by trends in interest rates and inflation, which can cause their value to fluctuate.
- Concentration Risk: The Fund intentionally holds a relatively small number of investments and may also invest in securities within a particular industry, sector or geographical focus. This means that the performance of a single investment, industry, sector or region may have a greater impact on the Fund's value. The value of the Fund may therefore be subject to large swings (both up and down) compared to a more diversified portfolio.
- Company Bond Risk: In unfavourable market conditions, bonds issued by companies may be harder to sell in a timely manner and at reasonable prices, than in normal market conditions. This could have a negative impact on the value of the Fund. In extreme market conditions this could affect the Fund's ability to meet investors' redemptions.
- Securities Lending Risk: The Fund may receive additional income for lending the investments it holds (e.g. company shares) to other parties. If the borrower fails to meet their obligations, then the Fund may incur a financial loss.

For more information about the Fund's risks, please see the Risk Factors section of the prospectus which is available at www.waystone.com.

Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested/before the proceeds of your investment are paid out. In some cases, you may pay less. Please check with your financial adviser or distributor for the actual charges.	
Charges taken from the Fund over the year	
Ongoing Charges	0.31%
Charges taken from the Fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses as at 15 August 2025. This figure may vary from year to year.

The Fund manager is making a contribution to one or more of the costs that comprise the OCF but may cease to make such contributions at any time. Investors may then see an increase in the OCF. The ongoing charges are taken from the capital of the Fund. It excludes portfolio transaction costs, except entry/exit charges paid by the Fund when buying or selling units in other collective investment schemes.

A dilution levy (an amount to cover dealing costs incurred by the Fund) may be charged when you buy or sell shares. This separate charge is normally only applied when dealing costs are significant.

For more information about charges (including any charges applied to the offset dealing costs), please refer to the Company's Prospectus, available at www.waystone.com.

Past Performance

Past performance is not a guide to future performance.

The past performance in the chart is net of tax and charges but excludes any entry or exit charges that may apply.

The Fund was launched on 30 September 2016. This share class was launched on 13 March 2017.

Past performance is calculated in GBP.

The Fund changed its name from WS Canlife Short Duration Corporate Bond Fund to WS Keyridge Short Duration Corporate Bond Fund on 18 February 2026.
