The Fund could invest 100% through other funds. In addition to the list of excluded companies, The Authorised Fund Manager has an active policy of engagement with Companies to seek to improve corporate behaviours.

Risk and reward profile

- We have calculated the fund's risk and reward category, as shown above, using an industry-standard method.
- The Fund appears in category 5, which is a medium/high category, because the value of investments in the Fund and income can increase/decrease depending on market conditions and performance due to factors such as the stock market volatility, changes in interest rates and fluctuations in commodity prices or real estate values.
- This indicator may not be a reliable indication of the future risk profile of the Fund
- The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean "risk free"
- This indicator does not take account of the following risks:
 - The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the Fund will achieve its objective and you may get back less than you originally invested.
 - The Fund may invest in emerging markets which have less well developed regulatory systems and disclosure standards.
 - The Fund may invest in debt securities and there is a risk that their issuers may fail to meet, or face delay in meeting, their commitments.
 - The Fund may invest part of its assets in smaller companies and property. These may be more difficult to sell than larger companies, with larger differences between their buying and selling prices.
 - In some market situations, it may be more difficult to sell the Fund's assets at a desirable price which may affect our ability to redeem investors' units.
