WS Epworth Climate Stewardship Fund for Charities (the "Fund"),

a fund within WS Epworth Investment Funds for Charities
Waystone Management (UK) Limited is the Manager of the Fund.

Income A GBP (ISIN: GB00BP9NT850)

Objective and Investment Policy

Objective

This Fund seeks income and capital growth over a minimum period of 5 years by investing at least 70% in the shares of UK Companies (UK based companies listed on the London Stock Exchange).; and a carbon intensity, substantially lower (at least 15% lower, but better if possible) than that of the FTSE All Share Index.

Investment Policy

We use a climate stewardship approach which excludes companies that extract or refine fossil fuels and which have a material involvement (e.g. 20% of turnover), with supplying the fossil fuel extractives and refining industry with goods or services; seeks to minimise exposure to other companies that are fossil fuel intensive or are responsible for high levels of greenhouse gas emissions; engages with companies whose shares are held in the portfolio to encourage more action to reduce the risk of climate change; and excludes companies

through ethical screening based on Christian principles. We can also invest in companies we believe will contribute to a transition to lower carbon emissions in the UK or globally and can hold other funds (including those managed by us) and cash/near cash.

Other information

Income from investments in the Fund will be paid out to you in accordance with the instructions given in your charity's original application unless otherwise amended.

You can buy and sell units in the Fund on any business day.

Risk and Reward Profile

We have calculated the Fund's risk and reward category, as shown above, using an industry-standard method.

The Fund appears in category 5, which is a medium/high category, because the value of investments in the Fund and income can increase/decrease depending on market conditions and performance due to factors such as the stock market volatility, changes in interest rates and fluctuations in commodity prices or real estate values.

This indicator may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean "risk free".

This indicator does not take account of the following risks:

The value and income from the Fund's assets may go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the Fund will achieve its objective and you may get back less than you originally invested.

- The Fund may invest in emerging markets which may be more volatile than developed economies and which have less well-developed regulatory systems and disclosure standards.
- In some market situations, it may be more difficult to sell the Fund's assets at a desirable price which may affect our ability to redeem investors' units.
- The Manager may determine to invest part of the Fund's assets in smaller companies. These may be more difficult to sell than larger companies, with larger differences between their buying and selling prices. They are also prone to more rapid changes in their prices in volatile market conditions.
