 Impact of these Costs and Charges on your Investment

| Year | Indicative Investment | Annual Gross Return | Annual Net Return | Return before Charges | Return after Charges |
|------|-----------------------|---------------------|-------------------|-----------------------|----------------------|
| 1* | £10,000.00 | 3.58% | 3.00% | £10,358.30 | £10,300.00 |
| 2+** | £10,300.00 | 3.58% | 3.00% | £10,669.05 | £10,609.00 |

The figures used in this table are for illustration and are not an indicator of the amount you may actually receive.

An assumed net return of 3% (i.e. after charges) has been used.

In the first year without fees, the performance you could have achieved would be 3.58%. The fees therefore have the effect of reducing the return by 0.58% or £ 58.30 in the first year.

The table assumed that no additional investments are made into, or withdrawals taken from your account.

*Year 1 assumes year of entry into the investment.

**Year 2+ is to indicate that the costs and charges are the same flat rate from the second year onwards.
