ACD'S REPORT

for the half year ended 30 April 2023

Authorised Status

LF Prudential Investment Funds (I) ('the Company') is an investment company with variable capital incorporated in England and Wales under registered number IC000508 and authorised by the Financial Conduct Authority with effect from 8 February 2007. The Company has an unlimited duration.

The Company is a Non-UCITS Retail Scheme and the base currency of the Company and each sub-fund is pounds sterling.

Shareholders are not liable for the debts of the Company. Shareholders are not liable to make any further payment to the Company after they have paid the price on purchase of the shares.

The AIFM is the legal person appointed on behalf of the Company and which (through this appointment) is responsible for managing the Company in accordance with the AIFM Directive and The Alternative Investment Fund Managers Regulations 2013. This role is performed by the ACD and references to the ACD in this Interim Unaudited Report and Financial Statements include the AIFM as applicable.

ACD's Statement

Proposed Sale of Fund Solutions Business

On 20 April 2023 Link Group announced the sale of the Fund Solutions Business ('FS Business') and that certain subsidiaries of Link Group, including Link Fund Solutions Limited ('LFSL'), entered into sale agreements with entities within the Waystone Group pursuant to which Link Group companies have agreed to sell to the Waystone Group: (i) the business and certain assets of LFSL; (ii) the business and certain assets of Link Fund Manager Solutions (Ireland) Limited (LFMS(I)L); and (iii) the entire issued share capital of certain other subsidiaries of Link Group, which together with the business of LFSL and LFMS(I)L comprise the FS Business (other than its Luxembourg and Swiss entities), but excluding Woodford related liabilities and, subject to normalised working capital adjustments, on a debt and cash free basis. The sale is conditional on various matters, including receipt of certain regulatory approvals, notices and consents from the FCA and the Central Bank of Ireland, anti-trust approval from the Competition and Consumer Protection Commission of Ireland and no in-depth investigation of the sale by the UK Competition and Markets Authority. It is possible that Irish foreign investment approval may also be needed depending on whether a foreign investment regime is introduced in Ireland before completion of the sale and the parties agree a filing is required. The sale is also conditional on contracts representing a significant majority of revenue in respect of LFSL's ACD business and LFMS(I)L's business being transferred to the Waystone Group and consent having been received from certain third parties in respect of the transfer of their business to the Waystone Group. The Waystone Group, LFSL and LFMS(I)L have agreed to work to achieve those and other conditions. The sale is not contingent on the Scheme or the Settlement becoming unconditional. The sale is targeted to complete by October 2023.

ACD'S REPORT *continued*

Proposed Sale of Fund Solutions Business *continued*

The above proposed changes will not impact either the ongoing management of the Company nor its continuing viability. Investors will be notified, assuming the proposed changes conclude satisfactorily, in due course on the timing of the transfer of the Company to Waystone Group.

Economic Uncertainty

The outbreak of COVID-19 in March 2020 caused significant disruption to business and economic activity, which was reflected in the fluctuations seen in the global stock markets for an extended period. However, after various national governments provided financial support and stimulus to their economies, combined with the development of effective vaccines to immunise populations, society and businesses are learning to operate in the post COVID-19 world which led to a recovery in asset prices.

In the first quarter of 2022, the geopolitical situation came into sharp focus, culminating in February 2022 with Russia's incursion into Ukraine, a position which continues to evolve. The consequences of this, combined with other factors, led to significant disruption to the global supply chains and soaring energy and commodity prices, leading to a significant increase in inflation in many countries. To curb the increase in global inflation, many nations' central banks have been increasing interest rates, a process which is expected to continue until inflation is brought under control. What is not clear at this time is whether the combination of high inflation and increasing interest rates will culminate in a global recession. With this level of uncertainty, it is reasonably foreseeable, that markets may see further periods of instability and consequently volatility in asset pricing.

Important Information

With effect from 1 December 2022, the Depositary, Custodian, Fund Accountant and Tax Agent of the Company changed to The Bank of New York Mellon (International) Limited.

With effect from 7 March 2023, the Investment Manager changed its address to 10 Fenchurch Avenue, London EC3M 5AG.

Cross Holdings

No sub-funds had holdings in any other sub-fund of the Company at the end of the period.

ACD'S REPORT *continued*

Securities Financing Transactions

The Company has the ability to utilise Securities Financing Transactions (being transactions such as lending or borrowing of securities, repurchase or reverse repurchase transactions, buy-sell back or sell-buy back transactions, or margin lending transactions). No such transactions have been undertaken in the period covered by this report.

DIRECTOR'S STATEMENT

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook and the Investment Funds Sourcebook, as applicable, as issued and amended by the Financial Conduct Authority together with the relevant provisions of the Alternative Investment Fund Manager's Directive and modified by a direction given by the Financial Conduct Authority where the ACD has opted to provide a NURS KII Document, a Key Investor Information Document for Non-UCITS Retail Schemes.

LINK FUND SOLUTIONS LIMITED

ACD of LF Prudential Investment Funds (I)
29 June 2023

LF PRUDENTIAL RISK MANAGED ACTIVE 1 ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Active 1 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 9%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 9%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in actively managed collective investment schemes. The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will have a high exposure to lower risk assets such as fixed income assets and cash. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED ACTIVE 1

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Mixed Investment 0-35% shares sector.

The Fund's performance may be compared against the IA Mixed Investment 0-35% shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

ACD of LF Prudential Risk Managed Active 1

29 June 2023

LF PRUDENTIAL RISK MANAGED ACTIVE 1

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 5.25%, P (Acc) 5.36% and A (Acc) 5.26% produced returns ahead of the 3.77% return for the IA Mixed Investment 0-35% shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following new funds have been added;

- M&G (Lux) Asia Corporate Bond Fund replacing Eastspring Asian Bond;
- M&G European Property Fund; and
- Apax Global Alpha Ltd.

LF PRUDENTIAL RISK MANAGED ACTIVE 1

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

LF PRUDENTIAL RISK MANAGED ACTIVE 1

ACD'S REPORT *continued*

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 1 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivatives Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

LF PRUDENTIAL RISK MANAGED ACTIVE 2 ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Active 2 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 10%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 10%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in actively managed collective investment schemes. The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will have a bias towards lower risk assets such as fixed income assets and cash but will always have some exposure to equities. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED ACTIVE 2

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Mixed Investment 20-60% shares sector.

The Fund's performance may be compared against the IA Mixed Investment 20-60% shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 5.87%, P (Acc) 5.95% and A (Acc) 5.88% produced returns ahead of the 4.69% return for the IA Mixed Investment 20-60% shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following new funds have been added;

- M&G (Lux) Asia Corporate Bond Fund replacing Eastspring Asian Bond;
- M&G European Property Fund; and
- Apax Global Alpha Ltd.

LF PRUDENTIAL RISK MANAGED ACTIVE 2

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 2 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in the exchange rate may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivative Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

INTERIM FINANCIAL STATEMENTS (UNAUDITED) *continued*
NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

LF PRUDENTIAL RISK MANAGED ACTIVE 3 ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Active 3 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 12%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 12%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in actively managed collective investment schemes. The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will be balanced between lower risk assets, such as fixed income assets and cash, and higher risk assets, such as equities. From time to time, however, the Fund may have a higher exposure to either higher risk or lower risk assets with the aim of meeting the Fund's objective. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED ACTIVE 3

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Mixed Investment 20-60% shares sector.

The Fund's performance may be compared against the IA Mixed Investment 20-60% shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 6.56%, P (Acc) 6.64% and A (Acc) 6.59% produced returns ahead of the 4.69% return for the IA Mixed Investment 20-60% shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following new funds have been added;

- M&G (Lux) Asia Corporate Bond Fund replacing Eastspring Asian Bond;
- M&G European Property Fund; and
- Apax Global Alpha Ltd.

LF PRUDENTIAL RISK MANAGED ACTIVE 3

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 3 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in the exchange rate may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivative Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

LF PRUDENTIAL RISK MANAGED ACTIVE 4 ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Active 4 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 14.5%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 14.5%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in actively managed collective investment schemes. The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will have a bias towards higher risk assets, such as equities. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED ACTIVE 4

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Mixed Investment 40-85% shares sector.

The Fund's performance may be compared against the IA Mixed Investment 40-85% shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 8.17%, P (Acc) 8.35% and A (Acc) 8.15% produced returns ahead of the 5.28% return for the IA Mixed Investment 40-85% shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following new funds have been added;

- M&G (Lux) Asia Corporate Bond Fund replacing Eastspring Asian Bond;
- M&G European Property Fund; and
- Apax Global Alpha Ltd.

LF PRUDENTIAL RISK MANAGED ACTIVE 4

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

During the half year the indicator changed from 4 to 5. The Fund has been classed as 5 because its volatility has been measured as above average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 4 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in the exchange rate may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivative Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

LF PRUDENTIAL RISK MANAGED ACTIVE 5 ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Active 5 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 17%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 17%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in actively managed collective investment schemes. The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will have a high exposure towards higher risk assets, such as equities. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED ACTIVE 5

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Flexible Investment shares sector.

The Fund's performance may be compared against the IA Flexible Investment shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 8.33%, P (Acc) 8.52% and A (Acc) 8.32% produced returns ahead of the 4.87% return for the IA Flexible Investment shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following new funds have been added;

- M&G (Lux) Asia Corporate Bond Fund replacing Eastspring Asian Bond;
- M&G European Property Fund; and
- Apax Global Alpha Ltd.

LF PRUDENTIAL RISK MANAGED ACTIVE 5

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 5 because its volatility has been measured as above average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 5 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in the exchange rate may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivative Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 1 ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Passive Fund 1 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 9%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 9%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in passive collective investment schemes (e.g. funds which track an index). The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will have a high exposure to lower risk assets such as fixed income assets and cash. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 1

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Mixed Investment 0-35% shares sector.

The Fund's performance may be compared against the IA Mixed Investment 0-35% shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 5.77%, P (Acc) 5.90% and A (Acc) 5.77% produced returns ahead of the 3.77% return for the IA Mixed Investment 0-35% shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following fund changes apply;

- The M&G Sterling Investment Grade Corporate Bond fund was removed, so the UK bond sleeve is now fully passive;
- Asia Fixed Income Dollar fund transitioned from Eastspring to M&G;
- Sell down of alternatives holdings; and
- Added L&G UK Property Fund.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 1

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 1 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivatives Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 2

ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Passive Fund 2 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 10%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 10%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in passive collective investment schemes (e.g. funds which track an index). The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will have a bias towards lower risk assets such as fixed income assets and cash but will always have some exposure to equities. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 2

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Mixed Investment 20-60% shares sector.

The Fund's performance may be compared against the IA Mixed Investment 20-60% shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 2

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 6.26%, P (Acc) 6.37% and A (Acc) 6.26% produced returns ahead of the 4.69% return for the IA Mixed Investment 20-60% shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following fund changes apply;

- The M&G Sterling Investment Grade Corporate Bond fund was removed, so the UK bond sleeve is now fully passive;
- Asia Fixed Income Dollar fund transitioned from Eastspring to M&G;
- Sell down of alternatives holdings; and
- Added L&G UK Property Fund.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 2

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 2 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivatives Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 3 ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Passive Fund 3 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 12%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 12%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in passive collective investment schemes (e.g. funds which track an index). The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will be balanced between lower risk assets, such as fixed income assets and cash, and higher risk assets, such as equities. From time to time, however, the Fund may have a higher exposure to either higher risk or lower risk assets with the aim of meeting the Fund's objective. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 3

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Mixed Investment 20-60% shares sector.

The Fund's performance may be compared against the IA Mixed Investment 20-60% shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 3

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 7.08%, P (Acc) 7.18% and A (Acc) 7.07% produced returns ahead of the 4.69% return for the IA Mixed Investment 20-60% shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following fund changes apply;

- The M&G Sterling Investment Grade Corporate Bond fund was removed, so the UK bond sleeve is now fully passive;
- Asia Fixed Income Dollar fund transitioned from Eastspring to M&G;
- Sell down of alternatives holdings; and
- Added L&G UK Property Fund.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 3

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 3 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in the exchange rate may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivative Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 4 ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Passive Fund 4 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 14.5%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 14.5%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in passive collective investment schemes (e.g. funds which track an index). The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will have a bias towards higher risk assets, such as equities. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 4

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Mixed Investment 40-85% shares sector.

The Fund's performance may be compared against the IA Mixed Investment 40-85% shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 4

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 7.97%, P (Acc) 8.08% and A (Acc) 7.98% produced returns ahead of the 5.28% return for the IA Mixed Investment 40-80% shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following fund changes apply;

- The M&G Sterling Investment Grade Corporate Bond fund was removed, so the UK bond sleeve is now fully passive;
- Asia Fixed Income Dollar fund transitioned from Eastspring to M&G;
- Sell down of alternatives holdings; and
- Added L&G UK Property Fund.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 4

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 4 because its volatility has been measured as average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 4 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivatives Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 5 ACD'S REPORT

for the half year ended 30 April 2023

Important Information

Refer to the 'Important Information' section on page 12.

Investment Objective and Policy

The LF Prudential Risk Managed Passive Fund 5 ('the Fund') aims to achieve long-term (in excess of 5 years) total return (the combination of income and growth of capital) by investing in a mix of assets from around the world and aims to limit the average volatility per annum over rolling 5 year periods to 17%.

There is no guarantee the objective will be achieved over any time period and the actual volatility, at any time, may be higher or lower than 17%. Capital invested is at risk.

The Fund aims to achieve its objective through investing at least 70% in passive collective investment schemes (e.g. funds which track an index). The Fund has a flexible investment approach with the freedom to invest in different types of assets to meet its objective. The Portfolio Manager will use in-depth research to forecast the expected change in value and risk of the different types of assets over a forward-looking 15-year period. This analysis is then used to work out the mix of assets (the 'target strategic asset allocation') to invest in to achieve the Fund's objective. The Portfolio Manager will review the target strategic asset allocation on an ongoing basis.

Based on the target strategic asset allocation, the Portfolio Manager constructs an actively managed portfolio to provide diversified, indirect exposure to global fixed income and variable rate assets, cash (including money market funds and near cash), equities and/or immovable property.

The Fund will have a high exposure towards higher risk assets, such as equities. The Portfolio Manager will adjust the asset allocation on an ongoing basis to reflect changes in the target strategic asset allocation and to take advantage of tactical investment opportunities.

The Portfolio Manager will select collective investment schemes to invest in from a focused range of funds and fund management groups (which may include other funds managed by the ACD, Portfolio Manager and their associates).

The Fund may also invest directly in equities, equity related instruments (e.g. warrants), fixed income and cash or near cash. It may also invest in alternative investments (e.g. infrastructure, private equity, alternative credit and hedge funds). Derivative instruments may also be used for the purposes of efficient portfolio management.

Other Information: The Fund's objective to stay within its specified risk profile may restrict the types and proportions of the assets it holds and limit the potential gains and losses.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 5

ACD'S REPORT *continued*

Benchmark

The Fund's comparator benchmark is the IA Flexible Investment shares sector.

The Fund's performance may be compared against the IA Flexible Investment shares sector. The ACD believes that this is an appropriate comparator for the Fund given the investment objective and policy of the Fund. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to help investors to compare funds with broadly similar characteristics.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 5

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT

for the half year ended 30 April 2023

Between 01 November 2022 and 30 April 2023 (the period in review) share classes R (Acc) 8.77%, P (Acc) 8.88% and A (Acc) 8.77% produced returns ahead of the 4.87% return for the IA Flexible Investment shares sector.

Market Overview

Financial markets ended a torrid 2022 on a positive note in the fourth quarter as equities and bonds recouped some of their previous losses. Despite this, both asset classes finished 2022 in negative territory.

The reversal was driven in part by signs that inflation was falling, which raised investors' hopes that central banks might slow their interest rate hikes. China's sudden relaxation of its zero-COVID policy and optimism about the reopening of its economy also lifted investor sentiment.

2023 started positively, with optimism about China's reopening and hopes that inflation would be tamed. Worries that optimism on both fronts had got ahead of itself and was fuelling a stockmarket rally, share prices retreated and bonds declined in February amid concerns that central banks would keep raising interest rates to tackle persistent high inflation.

In March, volatility spiked as the collapse of Silicon Valley Bank in the US and the emergency rescue of Credit Suisse in Switzerland raised fears about the health of the banking system globally. However, markets stabilised by the end of the quarter on the belief that the banking crisis had been contained.

Towards the end of the period in review, Europe was one of the best-performing regions and the technology-heavy Nasdaq Index rallied, following steep declines in 2022. In contrast, share prices in emerging markets and Asia lagged, with China's uneven economic growth recovery and US-China relations, particular worries.

There were also positive returns across US, UK, and European corporate bond markets, with US high yield and UK investment grade bonds (non-financial sector companies) doing well. Emerging market government bonds also enjoyed some respite after a tough 2022, and there was strong performance from Latin America.

Activity

The following fund changes apply;

- The M&G Sterling Investment Grade Corporate Bond fund was removed, so the UK bond sleeve is now fully passive;
- Asia Fixed Income Dollar fund transitioned from Eastspring to M&G;
- Sell down of alternatives holdings; and
- Added L&G UK Property Fund.

LF PRUDENTIAL RISK MANAGED PASSIVE FUND 5

ACD'S REPORT *continued*

PORTFOLIO MANAGER'S REPORT *continued*

Tactical Positioning

At the end of the period in review a small, diversified equity overweight (c.+1.5%) position was held with around 40% in China, 30% in Asia and Emerging Markets combined, to provide diversified exposure to the China re-opening theme, and the remaining 30% in the US. The overweight positions funded through underweights in investment grade corporate bonds (UK and Europe) and cash.

Outlook

Central banks' attitudes towards taming inflation remains a core theme for investors. Their task has been complicated by the emergence of stresses in the banking sector, and the likely impact of reduced bank lending going forward. The general strength of developed market economies and the near-term path of inflation will be key to their 'data dependent' actions and attempts to cool prices without causing a recession.

Additional variables include China's growth path post Zero-COVID, the impact of its stimulus measures, US-China tensions, and a raft of other geo-political sensitivities. Fragile investor sentiment, low conviction, erratic trading volumes and market depth could lead to additional bouts of volatility, which bring risks and opportunities for multi-asset portfolios.

FUND INFORMATION

Risk and Reward Profile

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.

The Fund has been classed as 5 because the volatility has been measured as above average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

The Fund targets a risk level of 5 which is a level of risk relative to the 4 other funds in the range. The risk and reward profile scale above is calculated differently. The two measures are not comparable.

Currency Risk: As the Fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.

Credit Risk: The value of a bond may be affected by its credit rating, the lower the rating the higher the risk of the issuer not paying interest or repaying the loan.

Property Fund Investment Risk: Property funds can become illiquid increasing the risk that a position cannot be sold in a timely manner or at a reasonable price.

Counterparty Risk: The failure of a firm involved in a transaction with the Fund or providing services to the Fund may expose the Fund to financial loss.

Derivatives Risk: A derivative may not perform as expected and may create losses greater than its cost.

Changes in Interest Rate Risk: A rise in interest rates generally causes bond prices to fall.

For full details of the Fund's risks, please see the Prospectus which may be obtained upon application and can be found on the ACD's website, www.linkfundsolutions.co.uk.

ACD'S REPORT *continued*

FUND INFORMATION *continued*

Comparative Tables

Information for 30 April 2023 relates to the 6 month period ending 30 April 2023, with the exception of the operating charges in the 'Other Information' section. The operating charges relate to the expenses incurred on an ex post basis over the 6 month period ending 30 April 2023, expressed as an annualised percentage of the average net asset value.

Where the Fund has significant investment in collective investment schemes, exchange-traded funds and similar products, the operating charges figure takes account of the ongoing charges incurred in the underlying schemes, calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date. Following an update to industry guidance, with effect from 1 July 2021, the operating charges figure also takes account of the ongoing charges incurred in closed end underlying schemes calculated as the expense value of such holdings at the half year end weighted against the net asset value of the share class at that date.

The performance of the Fund is based on the published price per 'P' Accumulation share which includes reinvested income.

The performance of the Fund disclosed in the above table may differ from the 'Return after charges' disclosed in the Comparative Table due to the above performance being calculated on the latest published price prior to the period end, rather than the period end return after operating charges.

RISK WARNING

An investment in an open-ended investment company should be regarded as a medium to long term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

INTERIM FINANCIAL STATEMENTS (UNAUDITED) *continued*
NOTES TO THE INTERIM FINANCIAL STATEMENTS
for the half year ended 30 April 2023

1. Accounting Policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 October 2022 and are described in those annual financial statements.

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland. The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014, as amended.

These financial statements are prepared on a going concern basis. The ACD has made an assessment of the Fund's ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements, covering the subsequent 12 months, and considers liquidity, declines in global capital markets, known redemption levels, expense projections and key service provider's operational resilience. The ACD also considered the Fund's continued ability to meet ongoing costs, and is satisfied it has the resources to meet these costs and to continue in business.

GENERAL INFORMATION

Share Capital

The minimum share capital of the Company is £100 and the maximum is £250,000,000,000.

Structure of the Company

The Company is structured as an umbrella company, in that different sub-funds may be established from time to time by the ACD with the approval of the Financial Conduct Authority. On the introduction of any new sub-fund or class, a revised Prospectus will be prepared setting out the relevant details of each sub-fund or class.

The assets of each sub-fund will be treated as separate from those of every other sub-fund and will be invested in accordance with the investment objective and investment policy applicable to that sub-fund. The sub-funds which are currently available are:

- LF Prudential Risk Managed Active 1
- LF Prudential Risk Managed Active 2
- LF Prudential Risk Managed Active 3
- LF Prudential Risk Managed Active 4
- LF Prudential Risk Managed Active 5
- LF Prudential Risk Managed Passive Fund 1
- LF Prudential Risk Managed Passive Fund 2
- LF Prudential Risk Managed Passive Fund 3
- LF Prudential Risk Managed Passive Fund 4
- LF Prudential Risk Managed Passive Fund 5

In the future there may be other sub-funds of the Company.

Classes of Shares

The Instrument of Incorporation allows income and accumulation shares to be issued.

Holders of income shares are entitled to be paid the distributable income attributed to such shares on any relevant interim and annual allocation dates.

Holders of accumulation shares are not entitled to be paid the income attributed to such shares, but that income is automatically transferred to (and retained as part of) the capital assets of the relevant sub-fund on the relevant annual accounting dates. This is reflected in the price of an accumulation share.

Valuation Point

The current valuation point of each of the Company's sub-funds is 12.00 noon (London time) on each business day. Valuations may be made at other times under the terms contained within the Prospectus.

GENERAL INFORMATION *continued*

Buying and Selling Shares

The ACD will accept orders to deal in the shares on normal business days between 8.30am and 5.30pm (London time) and transactions will be effected at prices determined by the following valuation. Instructions to buy or sell shares may be either in writing to: PO Box 384, Darlington DL1 9RZ or by telephone on 0344 335 8936.

Prices

The prices of all shares are published on every dealing day on the website of the ACD: www.linkfundsolutions.co.uk. The prices of shares may also be obtained by calling 0344 335 8936 during the ACD's normal business hours.

Other Information

The Instrument of Incorporation, Prospectus, Key Investor Information Documents and the most recent interim and annual reports may be inspected at the office of the ACD which is also the Head Office. Copies of these may be obtained upon application and, excepting the Instrument of Incorporation, can be found on the ACD's website, www.linkfundsolutions.co.uk.

Shareholders who have any complaints about the operation of the Company should contact the ACD or the Depositary in the first instance. In the event that a shareholder finds the response unsatisfactory they may make their complaint direct to the Financial Ombudsman Service at Exchange Tower, London E14 9SR.

Data Protection Act

Shareholders' names will be added to a mailing list which may be used by the ACD, its associates or third parties to inform investors of other products by sending details of such products. Shareholders who do not want to receive such details should write to the ACD requesting their removal from any such mailing list.
